Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5, 21 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Kanner et al. (U.S. Patent No. 6,767,356).

Kanner et al. disclose a clip that has at least two straight engagement legs (1102, 1104), extending parallel to one another including respective distal bridging tips and respective proximal insertion tips (1102A, 1102B, 1104A and 1104B) as well as a connecting bridge coupled to the distal bridging tips of the two engagement legs that are at least two elongated sections (1110) extending along side on another. The elongated section extends along a non-linear trajectory and includes one of a depression and a dome (see Fig. 67). Also disclosed is that the engagement legs and the connecting bridges are constructed from a biocompatible material (Col. 2, Paragraph 1). Furthermore, the two elongated section includes respective bulges that together form a space of separation between elongated sections. Applying a force to the elongated sections of the clip in an area of the non-linear deformable region causes the proximal insertion tips to pivot which can be seen between figure 68-71.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kanner et al. (U.S. Patent No. 6,767,356) in view of Wevers et al. (U.S. Patent No. 4,456,006).

Kanner et al. disclose the claimed invention except for the engagement legs being provided with gripping surfaces. Wevers et al. disclose notches (14) designed to facilitate gripping when implanted (col. 2 lines 10-13). It would have been obvious to one skilled in the art at the time the invention was made to have created the device of Kanner et al. with engagement legs having gripping surfaces in view of Wevers et al., in order to have a better grip of the implant.

Response to Arguments

Applicant's arguments with respect to claims 1 and 21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
